ENGINEERING INTERNSHIPS LOCATED AT NDSU Research & Technology Park

Aagard is hiring Engineering Interns and we want to speak with you! We are offering an outstanding opportunity to work as an Engineering intern at the NDSU Research & Technology Park while going to school Spring Semester 2020 and then joining us at our Aagard campus in Alexandria, MN for the summer. You will work with a team of brilliant engineers and gain invaluable hands on-experience. If you enjoy problem solving and continuous improvement projects, this is the perfect opportunity to propel you forward in your career!

Aagard builds optimal packaging solutions from concepting and engineering, through fabrication and assembly, to installation and servicing.

Come join our growing team of passionate and positive people that are WINNING TOGETHER HONORABLY!

Aagard Engineering University Internship overview
- Start your internship experience Spring Semester 2020, learning about equipment design, training and designing in 3D CAD modeling software
- Continue your internship through the summer of 2020, spending time on our manufacturing floor, gaining invaluable hands-on experience in building and testing automation equipment, fabricating parts, and providing engineering floor support.
- Temporary housing options are available while in Alexandria, MN.
